EXPERIENCE:

KPIT | Software - Cloud Engineer | Novi, Michigan

Jun 2025 – Aug 2025

- Designed and implemented a **FastAPI-based backend service** using **Python** to process EV charging data and support automated station rating generation, improving scalability, reducing response latency by **30%**, optimizing large-scale charging data processing
- Provisioned and managed AWS cloud infrastructure using **Infrastructure as Code (Terraform)**, automating the deployment of **EC2 instances, S3 buckets**, IAM users, groups, and policies while implementing RBAC and environment provisioning workflows.
- Designed and automated **CI/CD deployment pipelines** using **Jenkins, Ansible, AWS CLI**, and **Docker**, improving deployment efficiency by **35%**, accelerating release cycles, enabling reliable deployments across environments, and minimizing operational overhead
- Tech Stack:** Python, FastAPI, Machine Learning, AWS, Terraform, Jenkins, Ansible, Docker, AWS CLI, PostgreSQL, Git

Nasdaq | Cloud Operation Engineer | Pune, India

Jan 2023 – Jul 2024

- Automated environment provisioning and configuration across **UAT, Non-Prod**, and **Production** environments using **Ansible, Terraform**, and **Docker**, enabling scalable deployments, infrastructure consistency, and streamlined release management for Controller View applications
- Reduced manual deployment effort by **40%** by designing and automating **CI/CD pipelines** using **Jenkins** and **AWS CodePipeline**, enabling repeatable releases, automated rollback mechanisms, faster delivery cycles, and improved deployment reliability across environments
- Developed and maintained serverless automation workflows using **AWS Lambda** and integrated asynchronous application components with **Amazon SQS**, improving operational efficiency, event-driven processing, and system scalability
- Tech Stack:** AWS (Lambda, S3, SQS, CloudWatch, IAM), Terraform, Ansible, Docker, Jenkins, AWS CodePipeline, Datadog, Linux, Git

Interstellar Scientific Private Limited | Web Developer | Pune, India

Jul 2022 – Dec 2022

- Developed responsive and accessible **ReactJS**-based user interfaces using **HTML, CSS**, and **JavaScript**, improving user experience, cross-browser compatibility, application responsiveness, and frontend maintainability across multiple application modules
- Built, maintained, and debugged RESTful APIs using FastAPI and PostgreSQL while implementing JWT authentication and RBAC, improving application security and backend reliability.
- Integrated end-to-end systems and collaborated with cross-functional teams to deliver scalable features and improve overall system usability
- Tech Stack:** ReactJS, JavaScript, HTML, CSS, FastAPI, PostgreSQL, REST APIs, JWT, RBAC, Git

Elite Softwares | Software Engineer | Pune, India

Jan 2021 – Jul 2022

- Optimized **MySQL** and **PostgreSQL** database schemas and queries to improve application response times, enhance data retrieval efficiency, support reliable performance for web-based applications, and improve overall database scalability and maintainability
- Developed and enhanced user-facing features using **HTML, CSS**, and **JavaScript** while executing testing, debugging, and release documentation, collaborating within **Agile** development teams to improve application usability, maintain software quality, and support successful production releases
- Tech Stack:** Java, SQL, MySQL, PostgreSQL, HTML, CSS, JavaScript, Git, Agile, Software Testing

PROJECTS:

Snitch AI | AI-Powered Log Anomaly Detection in Cloud Environments | [Link](#)

Jan 2026 – Present

- Developed and deployed an **AI-powered log anomaly detection platform** in a cloud environment, processing **65,000+ cloud log records** and automatically detecting **3,277 anomalous events** using an LSTM-based deep learning model for proactive infrastructure monitoring.
- Built and deployed a containerized full-stack architecture using Docker, FastAPI, React, and AWS ECS, enabling scalable service deployment, environment management, and seamless frontend-backend integration.
- Established automated **GitHub Actions CI/CD pipelines** with Git-based workflows for code validation, Docker image builds, automated testing, deployment automation, and release management, enabling reproducible production-ready environments.
- TechStack:** Python, TensorFlow, LSTM, FastAPI, React, Docker, Pandas, NumPy, GitHub Actions

instaMIND.tech | On-Device Multi-Agent Security Surveillance - Google DeepMind X InstaLILY AI Hackathon | [Link](#)

Mar 2026 – May 2026

- Built and deployed an on-device video intelligence system achieving **<100ms P95 inference latency** using C++/OpenCV, FastAPI, and fine-tuned Gemma 3, optimized for **edge deployment**
- Implemented **on-device voice agent** processing **160ms audio chunks** using Gemma 3n 4B with unified voice+vision inference **without separate STT/TTS pipeline**, integrated with Twilio for real-time alerting
- Accelerated **Gemma 3 fine-tuning by 2x** at equal accuracy by rebuilding the training stack around Unsloth, QLoRA, and Flash Attention
- TechStack:** PyTorch, TensorFlow, Transformers, PEFT/QLoRA, Unsloth, llama.cpp, LangChain, WebRTC, WebSockets, OpenCV, Python, C++, React, FastAPI, Supabase, TypeScript, YOLOv8, Pillow

TECHNICAL SKILLS:

Languages: Python, Go, Bash, Java, SQL, JavaScript

Cloud Platforms: AWS (EC2, ECS, EKS, IAM, S3, Lambda, RDS, ECR, CloudWatch, VPC), Azure, GCP

DevOps, IaC & CI/CD: Docker, Kubernetes, Terraform, Ansible, Helm, Argo CD, Jenkins, GitHub Actions, CloudFormation, GitLab CI/CD

Monitoring, Networking & Security: Datadog, CloudWatch, Prometheus, Grafana, IAM, VPC, DNS, RBAC

Databases & Technologies: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Linux, Git, GitOps, REST APIs, Microservices, Containerization, Deployment Automation, Nginx, ELK Stack, Load Balancing, High Availability, Disaster Recovery

Certifications: AWS Certified Cloud Practitioner (CLF-Co2), Microsoft Azure Fundamentals (AZ-900), AWS Certified Solutions Architect

EDUCATION:

University of Colorado Denver | M.S. in Computer Science | Denver, CO

Aug 2024 – May 2026

Coursework: Deep Learning, Machine Learning, Software Architecture, AI with Reinforcement Learning, Algorithms

GPA: 3.8

Savitribai Phule Pune University | B.E. in Computer Engineering | Pune, IN

Aug 2019 – May 2023

Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Machine Learning

GPA: 3.9
